

Ada Lovelace

(1815-1852)

Imagine creating something that would change the world forever!

Ada Lovelace lived a long time ago and thought about magical machines that could do more than just math - they could create beautiful music and art too. In fact, Ada wrote the very first computer instructions!

Today, Ada is remembered by coders everywhere with a programming language named in her honor.

$$f'(x_0) = tg$$
