

runZero for Incident Response

The Best Response Starts With Knowing What's At Risk.

Without Visibility, You're Responding In the Dark

When a security incident strikes, every second matters. Without full visibility into your attack surface — every asset, risk, connection, and potential impact — you're responding in the dark. runZero changes that.

runZero gives you real-time, complete visibility across your entire network. So you can quickly pinpoint the source of an attack, assess its impact, and act decisively to contain the threat.

Unlike traditional tools which leave you scrambling with outdated or partial data, runZero continuously maps and tracks every device, giving you an up-to-the-minute view of your environment. Our platform provides clear, actionable insights that allow your team to move quickly and make informed decisions. With full visibility into your network, incident response becomes more efficient and effective, so you can stay in control and get back to business with confidence.

When time decides the victor, knowing how a threat spreads and isolating affected areas fast is critical. runZero's real-time insights eliminate guesswork, letting your team respond confidently, reduce damage, and regain control — because in the race against attackers, information is your greatest weapon.

Incident response risks at a glance

Unprepared & vulnerable

73% of organizations expect a cyber incident to disrupt their business within the next 12–24 months.¹

Unseen threats

70% of successful attacks stem from hidden or unmanaged assets.²

Exploited in hours

62% of attackers find an exploitable exposure within 5 hours — 74% exploit it within another 5 hours.³

Just a hop away

62% of exploited assets are 1 hop away from sensitive data. By 4 hops, **80%** of assets lead to critical exposure.⁴

Breach in a day

72% of attackers can complete an end-to-end breach in less than 24 hours.⁵

The overall experience has been fantastic. It has really provided a lot of insight into our environment, insight we didn't know we needed. We thought we had great coverage and thought we knew what was on our network until we ran runZero. It helped us identify some significant gaps that we took care of.

VP of Information Security,
Granite Advance

Stop Breaches Before They Start.

runZero cuts off breaches at the source — your exposures.

- Full attack surface discovery
- Up-to-date asset inventory
- Network segmentation & lateral movement analysis
- Vulnerability & risk identification
- 3rd-party risk insights

Respond Faster. Contain Sooner.

runZero slashes dwell time — because every second counts.

- Live & compromised asset search
- Historical state & change tracking
- Network & lateral movement tracking
- Real-time exposure & vulnerability insights

Recover Faster. Stay Stronger.

runZero gets you back to business and keeps threats out for good.

- Asset restoration & validation
- Patch & exposure remediation verification
- Change tracking & drift detection
- Follow-up scanning for lingering threats

Mitigate risks faster with clear visibility into what's at stake

Many security tools leave you scrambling to trace breaches and assess attack impact. runZero changes that. It delivers real-time, comprehensive visibility into every device and connection, accelerating investigations and containment. With precise, actionable insights, you respond faster, minimize damage, and restore operations with confidence — no guesswork, just control.

Deployment & Management	Attack Surface Coverage	Exposure Detection	Actionable Insights	Compliance
runZero				
Provides complete visibility across IT, OT, and IoT assets, exposing hidden risks before they become breaches.	Ensures incident preparation playbooks, simulations, and exercises cover your entire attack surface, for full response confidence.	Minimizes attacker dwell time with precise exposure intelligence for swift containment and complete eradication.	Delivers detailed post-incident and compliance reporting data, reducing penalty risk and preserving trust and reputation.	Enables proactive monitoring, cleanup, and improvement by identifying blind spots, security gaps, and response weaknesses.
Other Solutions				
Leave blind spots with incomplete data, reactive security, and fragmented visibility, allowing undetected risks.	Rely on incomplete asset data, leaving critical gaps that weaken response effectiveness during real attacks.	Leave security teams with fragmented data, delaying containment and leading to deeper compromise and costly breaches.	Provide fragmented data, complicating reporting and escalating the risk of penalties, scrutiny, and reputational damage.	Overlook lingering threats, increasing re-compromise risks and weakening security, incident response, and resilience.

runZero delivers the most complete security visibility possible, providing organizations the ultimate foundation for successfully managing exposures and compliance. With a world-class NPS score of 82, runZero has been trusted by more than 30,000 users to improve security visibility since the company was founded by industry veteran HD Moore.
