

runZero for Unmanageable & Unknowns

Don't let unknown assets become unintentional risks.

See Everything. Miss Nothing.

What you don't know **will** hurt you — and attackers know it. Armed with the latest tradecraft, they target the unknown and unmanageable assets across your attack surface, turning them into entry points for sophisticated attacks.

Legacy tools can't keep up. Designed for known and manageable assets, they leave blind spots everywhere. OT and IoT? Not even on the radar of traditional discovery methods, which are risky, disruptive, and can't reach these environments.

Meanwhile, security teams drown in CVEs — threats that represent only a fraction of today's real risks. The result? Risks lurking in the shadows — exactly where attackers thrive.

runZero takes a different approach. We find every asset, even the ones your other tools can't. No agents. No credentials. No risky methods. Our platform fingerprints everything — forgotten endpoints, elusive IoT and OT, internal and external assets. **If it's connected, we'll find it.**

And we don't stop at CVEs. runZero uncovers hidden risks your legacy scanners miss — the misconfigurations, segmentation flaws, and obscure security gaps attackers count on. With runZero, you eliminate blind spots and take back control of your attack surface — before unseen threats become unstoppable breaches.

Unmanageable & unknown risks at a glance

More assets, more risk

393,000 assets: the average number a security team must defend.¹

Blind spots

60% of assets have limited or no visibility for defenders.²

Unscanned & overlooked

42% of assets run without agents, making them invisible to scanners — yet they account for **64%** of high-level risks.³

Unmanaged & at risk

67% of manageable assets are unmanaged, expanding the attack surface.⁴

Attacker targets

70% of successful attacks exploit hidden and unmanaged assets.⁵

The overall experience has been fantastic. It has really provided a lot of insight into our environment, insight we didn't know we needed. We thought we had great coverage and thought we knew what was on our network until we ran runZero. It helped us identify some significant gaps that we took care of.

Chris Nadeau

VP of Information Security,
Granite Advance

Turn Unknown Into Known.

runZero goes where traditional tools can't, bypassing agent and authentication limits.

- Agentless active scanning, passive discovery & API integrations
- Authentication-free discovery
- Full internal & external attack surface coverage — IT, OT, IoT, on-prem, SaaS, fully air-gapped

Go Beyond Traditional Vulnerabilities.

runZero identifies unconventional risks tied to unknown and overlooked assets.

- Deep, precise protocol & service fingerprinting
- Exposure detection beyond CVEs — open ports, misconfigs & more
- Detects risky interconnections — shadow IT, segmentation issues

Focus on the Needles, Not the Haystack.

runZero spotlights the unknown assets that present the greatest risk.

- Context-driven device profiles assess high vs low risk
- Risk prioritization & grouping
- Granular insights guide effective action
- Streamlined remediation accelerates resolution

What others miss, we don't.

Attackers exploit what you can't see. Legacy tools leave gaps, overlooking unmanaged and unknown assets. runZero closes those gaps, finding devices and risks others miss. Our intuitive platform delivers actionable insights, helping you pinpoint vulnerabilities. With runZero, you reduce risk, eliminate blind spots, and confidently secure your organization.

Deployment & Management	Attack Surface Coverage	Exposure Detection	Actionable Insights	Compliance
runZero				
Provides flexible, agentless deployment with no authentication needed — expanding visibility to unmanaged & unknown assets.	Ensures full-spectrum visibility — internal, external, IT, OT, & IoT — for peace of mind no asset is overlooked.	Expands detection beyond the usual threats, revealing hidden dangers in unknown devices — denying attackers any foothold.	Delivers precise, actionable data so teams can focus on real threats & outmaneuver attackers before they strike.	Keeps you ahead by uncovering unknowns & meeting downstream requirements reliant on full attack surface visibility.
Other Solutions				
Require complex, resource-draining appliances, agents, & authentication — limiting visibility to known & managed assets.	Restrict attack surface visibility, creating blind spots where dangerous devices remain unchecked.	Focus on CVEs & conventional threats, leaving attackers ample opportunity to launch stealthy attacks.	Use theoretical scoring & incomplete insights, creating false leads while attackers get a head start.	Leave you exposed to regulators & affected parties when an attacker or audit reveals missed assets & risks.

runZero delivers the most complete security visibility possible, providing organizations the ultimate foundation for successfully managing exposures and compliance. With a world-class NPS score of 82, runZero has been trusted by more than 30,000 users to improve security visibility since the company was founded by industry veteran HD Moore.
